Datacenter products and services

Not enough hours in the day?

A thorough and current audit of your tape library is a must. And, as you know, it's a process that requires a great deal of your team's time.

Whether you're complying with regulatory requirements or preparing for an upcoming relocation, consolidation, merger, or liquidation sale, **your tape library inventory must be accurate and up-to-date.**

Media Recovery will efficiently conduct your on-site or off-site tape audits and data checks — **with 100% accountability** and the least amount of downtime. Our highly skilled and experienced staff uses

our proprietary software to complete your audit, so your valuable time can be spent on daily operations and your Datacenter stays running smoothly.

Find out more about our Raised Floor Environment Services, including: Relocations & Consolidations, Datacenter Cleaning, Tape Removal & Re-slotting, Tape Library Reconfiguration, and Asset Recovery.

Learn how to complete your tape audits more effectively while **ensuring compliance** with third-party requirements. Benefit from expertise informed by decades of hands-on experience helping thousands of Datacenters. Please visit **www.mediarecovery.com/audit** to learn more or request information.
